1. Qualitative Information on the Consolidated Results for the 3rd Quarter

During the first three quarters of the current fiscal year (the nine months from April 1, 2023 to December 31, 2023), the legal status of COVID-19 was downgraded to Category V, economic and social activity normalizing, and business conditions gradually recovering. However, the economic outlook remained uncertain due to factors including a tense international situation and increases in the prices of resources.

The Company transitioned to a holding company structure on October 1, 2023 and changed its business name to Meitec Group Holdings Inc. Also, on the same date, the Engineering Solutions Business was inherited by the successor company MEITEC CORPORATION (the business name changed from MEITEC SPLIT PREPARATORY COMPANY on the same date).

MEITEC (MT) and MEITEC Fielders (MF), which are responsible for the Engineering Solutions Business that accounts for more than 90% of the Group's consolidated net sales, saw orders remain strong as leading manufacturers that constitute the Group's major clients invested in technological development focused on the next generation of products. Furthermore, as a result of continuing proactive recruitment with an eye on medium and long-term growth, the number of engineers (total for MT and MF) as of December 31, 2023, was 12,407 (up 393, or 3.3% compared to December 31, 2022), including 824 (MT: 459, MF: 365) new employees joining them in April 2023. In addition, as a result of promoting assignments of both new and existing employees in response to orders, the two companies achieved both an increase in the number of engineers assigned to clients and improvement in the utilization ratio. Note that working hours decreased slightly year on year, mainly due to a decrease in overtime work.

As a result, consolidated net sales for the period under review increased \$6,800 million, or 7.7%, from a year earlier to \$95,497 million. Consolidated cost of sales increased \$4,696 million, or 7.3%, from a year earlier to \$68,877 million, due mainly to an increase in labor expenses associated with growth in the number of engineers, and consolidated selling, general and administrative expenses increased \$162 million, or 1.3%, from a year earlier to \$12,292 million. As a result, consolidated operating profit increased \$1,941 million, or 15.7%, from a year earlier to \$14,327 million. Consolidated ordinary profit increased \$1,887 million, or 15.2%, from a year earlier to \$14,335 million, while profit attributable to owners of parent increased \$1,313 million, or 15.5%, from a year earlier to \$9,804 million.
